DETAILED ACTION

Specification

1. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Please update the status of the related applications mentioned in the specification

Claim Objections

2. Note that the previous claim objection has been withdrawn. However after further consideration a new claim objection follows.

3. Claim 1, "possible" should be deleted in step a) and step b).

Claim 2, the limitations recited in lines 1-4 are directed to apparatus type claimed limitations rather than method type claimed limitation. Please correct. The same comment applies to claims 3-6.

Claim 6, line 3, "possible" should be deleted. In addition, what does it mean by "a plurality of possible candidates"?

Claim 7, line 3, "possible" should be deleted.

Claim 11, line 4, "Viterbi" should be replaced by —symbol—so as to be consistent with antecedent in line 2. In addition, claim 11 when taken as whole provides an endless loop between the DFE and the decoder with not other input(s) to the DFE and a final

output to the "decoder". The claim should be amended so as to provide proper input to the DFE besides the feedback signals from the decoder and to provide final output to the decoder besides the feedback signals.

4. This application is in condition for allowance except for the following formal matters noted above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

Allowable Subject Matter

8. Claims 1-8 and 11 would be allowable if amended to overcome the objection set forth above.
